

# “How To” Access Video Streaming

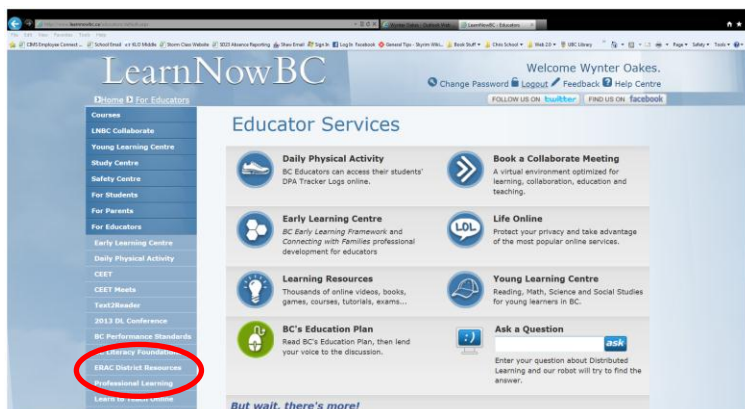

Navigate to **Learn Now BC** ([www.learnnowbc.ca](http://www.learnnowbc.ca)). There is a quick link on the KLO website homepage.

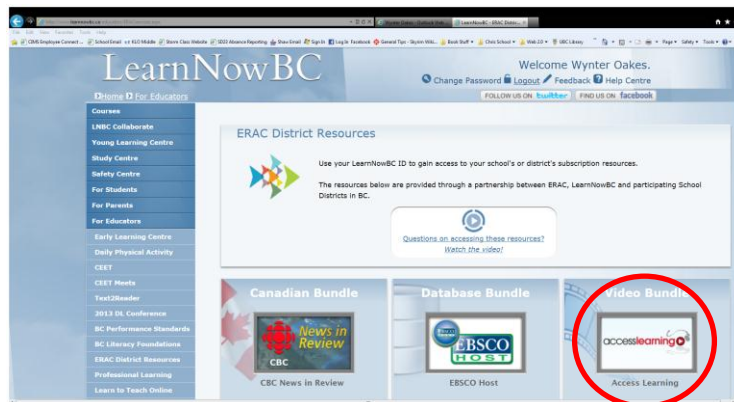

**Login** using the link at the top right of the homepage. If you do not have an account you can quickly sign up for one. As an educator you have access to more than just video streaming. Educators have full access to all resources on this site. Note: parents and students also have the ability to create an account, login and access resources, however their access is more limited than the access for educators.

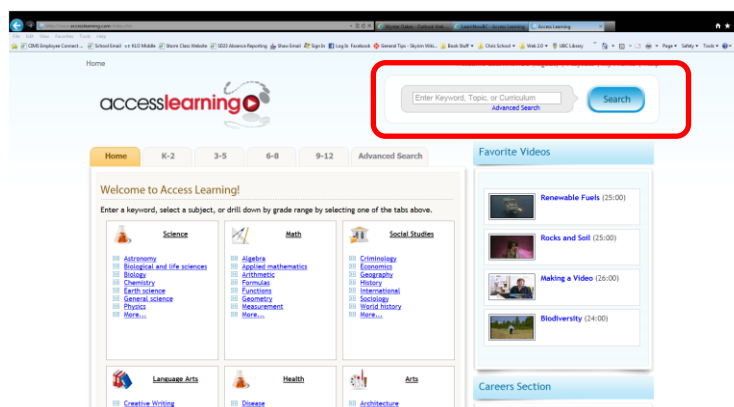

Once logged in select the **ERAC District Resources** tab on the left. Educators and students in SD23 have access to these resources once logged in to Learn Now BC.

For access to the items for video streaming, select **accesslearning**.

Once in the accesslearning database you can **search** for videos based on keywords, a topic or title.

To filter the search results you can select **full program** or **program clips**.
